# To the Reader, Reader,

I Here present to thy view (in this little Enchiridion or Pocket Companion,) my Astrological Judgments on the Portents, and Effects of the Celestial Bodies in the ensuing Year 1720, which being much more Enlarged now than 'twas in last Years Diary, for in the following Columns under Monthly Remarks I have there presented thee with my Astrological Judgment, which if thou willing I intend to continue on for future Years and also to Enlarge upon the aforesaid Subject, my Labour is but gratefully accepted, and pass current in the World, as well as its Fellows: And I know no Reason why it should not, for here are most things that be necessary, and generally useful for all sorts of Persons, as the Tables of the Planets Motions and Aspects; with the Moon's South and the Sun and Moon's Rising and Setting, besides many other things which the Intelligent Reader may readily discover: And I have herein endeavour'd to make it both plain and easie, as well pleasant and profitable; hoping it will merit the Reader's Approbation; which will be to me a sufficient Satisfaction; and encourage me to amend *ad Infinitum*, for the future.

Farewell,

I am (Courteous Reader) thy  
Faithful Servant,

July 24th.

1719.

SALEM PEARS

Within the Confines of this little Page,  
 (For ev'ry day) you have fair *Luna's Age*;  
 By which (and the next Table) you with ease,  
 May find the motion of the restless Seas.

A Table of the Moon's Age.

AWAKE, awake, my Drowsie flumbring muse,  
 Oh that I may the truth for ever chuse.  
 Great Jove inspire my Brain, my Pen direct,  
 That I the truth may evermore affect.  
 Assist ye Heaven's; you mighty fates infuse  
 Zeal in my Heart; that so my hands may chuse;

To hold my Quill, no longer then my Mind,  
Is unto True and Vertuous acts inclin'd.  
Give me assistance from the Sacred Hill,  
Grant that I once might dip my feather'd Quill  
In Helicon, where I might wash me too  
Wash me I say, and so return more pure.

And being free I might have thought to do,  
 But Sing the Praise of such as do improve  
 Their Hands to labour, and their hearts to love,  
 That nought but Truth and Vertue can approve,  
 That purchase Vertue at the greatest Price,  
 That won't be wicked to be counted Wise.

# July hath XXXI Days.

Protect the Sheep and keep the Wolves in fear,  
 Left by Usurping, they the Lambs should tear;  
 As too too oft they do, I am in Doubt,  
 Too many in Sheep Cloathing range about,  
 Rouze up, rouze up therefore, the Man whose Mind  
 Is unto Christian Piety inclin'd.

This Table Teacheth how to Increase Wealth,  
 Tho' some account it near as bad as Srealth.  
 However Read the Fifthenth Psalm and than,  
 You'll find the Judgment of an Holy Man.  
 Prolifick Money, which way thou dost Gender,  
 Appears to me a Matter of much wonder;  
 A greater wonder to, oft makes me frown  
 Because I find my Mony Barren grown.

## Astral Observation.

Of the Eclipses for this present Year, 1720.

**T** Here will be only two Eclipses this Year, and both of the Sun, Invisible.

The first Eclipse happens on *Thursday, January* the 28th at 10 in the Morning, in 19 degrees of Aquarius, but not to be seen in *England*.

The Second and last Eclipse will be on *Sunday* the 24th of *July*, about 4 in the Morning, 'tis Celebrated in the 12th degree of Leo, and will prove Invisible like the former; for the greatest Observation happens about a Quarter past 3 in the Morning, therefore will be over ere the Sun riseth.

### Of the Winter Quarter.

Which commences on Friday, *December* the 11th 1719. at 6 min. past 8 in the Morning. The Sun then enters the first scruple of the Tropical and Solstitial Sign Capricorn: At which time he hath his greatest South Declination from the Æquator, making the shortest day and longest wearisome Night in our Hemisphere.

Nor nought but cold and shivering winds Surround  
Sharp nipping blast's instead of flowers abound,  
Driving the woolly Snow upon the plain.

And little hopes of pleasure now we gain:

For in the fields we find no fragrant Flowers,  
Boreas makes Houses pleasanter than Bowers.

Give me a merry Heart, and Honest Wife,

The grace of God; also a quiet Life.

Besides Grant me a trusty Friend in store,

Having enough, for Wealth I'll ask no more:

Nor envy the Rich Miser, or the Sott,

That takes delight in nought but Pipe and Pott,

Whose Hands dare feed no other but his Mouth,

That can't see Vertue, tho' the Sun be South:

## Astral Observations.

720. That seldom speaks but he profanely Swares;  
and by his lies sets others by the Ears:  
Yet being blind by Nature, 't makes me wonder!  
How for a Whore he in the Night can blunder?  
His Ears are shut against the crying Poor;  
But he can hear his Dogs a Mile or more.  
Whose Feet runs to the Tavern full as swift,  
As thence unto the privy ve doth shift,  
Who' the Church way he seldom e're can find,  
And when he's there as little he doth mind.  
Shall I enjoying little with content,  
Grieve 'cause my vacant Hours I've not spent,  
Among such Senceless burdens of the Earth;  
Who are far worser then untimely Birth.  
With such Apes were most severely bang'd,  
Did not care if half of them were H — .  
And then perhaps poor Honesty and I  
Might live together in Prosperity.  
At the time of this Ingress of the Sun into Capricorn, we have 27 degrees of Sagittary Ascending in our Horizon, and 2 degrees of Scorpio Culminating. Saturn and Venus are in the tenth House, ♄ is in the 2 and ♀ in 18 degrees of Scorpio. Jupiter is in the Sixth House in 4 degrees of Libra, Mars is in the Third House in 2 degrees of Aries, the Sun and Mercury are both in the Ascendant, ☿ is in 19 degrees of Capricorn. The Moon is in the 4th in 10 degrees of Taurus, ♄ is in 21 degrees of ♎ in the Eighth House, and ☿ is in 21 degrees of ♊ in the second, the Moon separates from a Trine of the Sun, and applies to an Opposition of ♄ and ♀, and a Trine of ☿ we have also a ☐ of the ☉ and Jupiter, and an opposition of Jupiter and Mars, and a \* of Saturn and Mercury, and a \* of Venus and Mercury, besides we have a conjunction of Saturn and Venus into the sign, all near the time of the brumal Ingress. Whole effects are very different, and signifies some Notable

## Astral Observations.

alterations in the World; the Opposition of Jupiter and Mars, and the ☐ of the ☉ and ♀, and the ☉ and ♀, all beholding each other from certain Signs, is very significant, and in all probability cause much uneasiness among great Men of Nation and also it denotes detriment to the Clergy men. Jupiter in the ninth House in Libra, that *Signum Stitit*, as our Authors term it, seems as tho' there were more uneasiness among Men then needs reason and likewise in Religion then will be profited therefore O Lord let not the Wicked, triumph the just, but let the Righteous stand like a Rock.

Various Reports about do fly

But yet Religion's most the cry.

The Conjunction of Saturn and Venus in the House, in the Subtile Scorpion, should probably note that a Lady of no mean quality will be afflicted with some Lingring disease, if not dye, and some difficulty to Women in Child-bed, &c.

### Of the Spring Quarter.

**W**Hich this Year, according to Scientia firmum, Commences, *March* the 9th at 10 20<sup>m</sup> Mane. The Sun then Entering the Oriental Equinoctial Sign Aries: and has now no Declination from the Equator, but Rises and Sets at Six, making the Day and Night of an equal Length. Quarter Continues during the Sun's Progress through Aries, Taurus and Gemini.

Behold the jovial Season of the Year,  
Like mounting Phœbus brightly doth appear:  
Now the cold Snow and frozen Ice Retreat,  
And shivering blasts are over come by heat,  
The pretty Lark mounts early in the Morning,  
And Various Herbs and Flowers and Field add  
The Cuckoo now is seldom out of tune,  
And Maidens are as merry as in *June*,

## Astral Observations.

King together near the pleasant **Bowers**,  
 among the Violets, Coughsips, and fine Flowers:  
 is Usual in the Month of *May*,  
 ev'ry Field is beautiful and gay,  
 gather of these Flowers as they spring;  
 like the bird among the bushes sing,  
 sing delight in sweet and harmless play;  
 singing perhaps they can't offend this way:  
 by your leave, fair Ladies I advise,  
 remember you must merry be and wise,  
 wanton *Venus* and her purblind boy,  
 shall your future Merriments destroy:  
 you I be for'st to mourn when others sing,  
 thereby make a Winter of your spring.  
 And my Lines and don't scorn my advice,  
 learn of all, if you'd be truly wise.  
 At this Ingress of the Sun in Aries, we have 8 de-  
 grees of Cancer ascends in our Horizon, and 3 de-  
 grees of Pices Culminating, Saturn is in the 16th house  
 retrograde in the 26 degrees of m. Mars is in the 28  
 degrees of ♄ in the 12th House, *Jupiter* is in the 4th  
 house, in the first degree of Libra Retrograde, the  
 Sun and Mercury are both in the 10th House, Mer-  
 cury is in 28 deg. of ♄ Venus is in the 9th in 20 deg.  
 of ♀ Aquarius, the Moon is in the 2d House, in the 8th  
 degree of Leo. 68 and ♄ are in the 3d and 9th Houses,  
 Saturn 16 deg. of ♄ being the place of the ♄, the  
 Sun defluxes from the sextile of ♄, and a Δ of the  
 Sun and a Δ of ♀ and a ♄ of ♂, and applies to an  
 opposition of ♄, we have also an opposition of the two  
 tunes, and an ♂ of the sun and *Jupiter*, and an  
 ♄ and Mercury, and a Δ of ♄ and ♂, and a  
 ♄ of the Sun and Mercury, and a Sextile of ♂  
 ♄, and a Trine of Saturn, and a Quartile of ♄  
 ♄, and a Δ of the Sun and Saturn, all near the  
 place of the Ingress of the Sun into Aries, from  
 whence we may see the various motions of the Ce-  
 lestia

## Astral Observations

**Iestial Bodies.** About this time we may Observe the some Persons (if they prove more forward then they ought to do) may unhapily fall out of the Frying pan into the *Fire ex Fumo in Flamman.*

Reputation in the World is a thing like a Glass which being once crack'd, will never be otherwise then crasy on the other side, I may say, if any Man had the strength of Samson, the Knowledge of Plato the Puissance of Hercules, the Courage of Hannibal the Moderation of Scipio, the Riches of Cræsus, the Eloquence of Demosthenes, the stout Courage and Conduct of Alexander, and yet, like Diogenes in Tub. conceal his Parts and Abilities, he would appear no more to the World then a painted Face that gives no heat. Let us not suffer our selves to be dazzled by a false Lustre, that we perceive not till we find we are precipitated into great Absurdities, and we are too apt to presume every Man to be good till the contrary appears. or is proved. The first part of this Quarter [either March or April] we may expect to hear of some great Donns turn'd out or discarded, others are advanced to Honour in their Places, the aged Persons, and those no less Eminent in the World we hear make their *Exit*, as well as the Poore of a meaner sort; and thus we may observe, that sometimes according to the Adage, Death delights to feed on dainties, but this I think relates most to foreign parts.

Many and very significant are the Configurations of Planets this Quarter, but in particular this Month of March, about the Sun's entrance into Aries let us patiently wait to see the Effects, and how matters are vigorously transacted in Mundane Affairs.

Under the Signs Taurus and Scorpio, Chronus and Mars their angry strokes bestow. But Britain being Subject to the Ram, Will rest in safety, whensoever they come; When little blasts Approach, great storms pursue. Wee'll joy through storms to scape when art is true.

## Astral Observations. Of the Summer Quarter.

This Quarter takes it's beginning when the ☉ Enters the first Scruple of Cancer, and that is this year on Friday June the 10th at 5 min. after 11 in the Morning; at which time the Sun hath his greatest Amplitude towards the North making the Longest Day and Shortest Night of our Hemisphere.

The Hight of Summer now comes on a pace  
The Fields like Phœbus shew a Beautifull face:  
And by Surrounding heat in little time,  
Attains the Perfect Culture of their Prime.  
Then by degrees as Sol the Plaines Survey,  
He brings all things unto Maturity:  
Then Sythe and Sickle both provided are,  
And with Tough labour Industry and care;  
They both the Fields and Pleasant Meadows pare.  
And then with Speed in the Barn and Store-house  
They plac't and keep it for a future Ue,  
Then thye Rejoyce, and some be sure give thanks  
Others abuse it by their idle pranks:  
Some Curse the Poor and Indigent and say;  
All such shall Starve as did in Summer play,  
Yea let not one say they be sav'd alive,  
But that with care brought Hony to the Hive.  
'Tis true Indeed the lazy ought to want,  
And none can Reap, except he first doth plant:  
But by your leave, you shoud alway Remember,  
The poor and needy that want a Defender,  
Whose Shaking Heads, weak Hands, and feeble Knees  
Proclaimes aloud their many Miseries.  
Heaven's Decreed such needy ones to be,  
Revive s of thy Frozen Charity:  
That thou by feeding them like the wise Ant  
Might'st provide against a time of want  
And Reap for it an Hunderd fold Increase  
And that great Harvest is a better place.

At such time as this Quarter takes it's beginning, we have 20 degrees of ☉ Ascends in the East, and 17 degrees of ♀ on Medium Cœli. The ☉ applies to a Sextile of Saturn, and Δ of Jupiter, and an 8 of ♀. The Position of the Heavens at this Ingreſs and for the most of the Month of June in the general Promiseth a pretty quiet season in Mundane Affairs, but in July the Stars are more Active for we therein have a ☐ of the two infortunes and a Square of the Sun and ☉ and a ☐ of ♀ and ☿ and a Conjunction of Mars and Mercury, all bad Signs viz. ♄ and ♀, which Looks with a rugged Countenance.

Under the noble Lion add the Bull,  
The Scorpion also must Expect a fall,  
Are in the Influence of those thwarting Rays,  
Bringing up Thunder Storms, and Cloudy Days.  
Tempest by Night, and Lightening o're the Air,  
The Morning to appears more foul then fair.  
The Actions also Cross, to wrath inclin'd  
By suit of clamour like the Raging wind.

## Annual Observations.

Soon here, soon there; like to the whirly-puff,  
Some Men are carri'd and on high they huff,  
And kick abroad false tales strife and Debate,  
Which brings their Ruin. then Repent to late

### Of the Autumnal Quarter.

Which beginneth this Year, on *Sunday September* the 11th. at 52<sup>m</sup> past 11 at Night, at which time the Sun maketh his Entrance into the first Scruple of the Æquinoctial Sign *Libra*, and having now no Declination, he maketh equal day and night, as at the vernal Æquinox.

At this ingress of the Sun into *Libra*, we have 27 deg. of *Pisces* Culminating, and 25 deg. of *Cancer* Ascending in our Horizon the Moon reflexes from an  $\text{S}$  of  $\text{H}$ , and a  $\Delta$  of the Sun and Mars, and applies to the Trine Venus, which is a pleasant Position, and also the Moon is Lady of the Ascendant in the House of Friendship, all the other Planets are under the Earth in the third, fourth and 5th Houses, and but little afflicted from whence I suppose that the general Affairs about this ingress, and during the whole month will for the most part tend only to Unity and Concord, for presently after the beginning of this Autumnal Quarter, we have a  $\text{Q}$  of the benevolent Planets,  $\text{Q}$  and  $\text{V}$ , in  $\text{Q}$  which are of a sweet and quiet nature, but in the following Month October, we have fixings of the Planets, which looks with a rugged Countenance, yet the Position of  $\text{V}$  with the *Virgins* Spike, denotes the Rise of some Men to considerable degree of Honour, but for the other Significations, let us hope well and trust to Providence. To conclude let us pray for the welfare of this Kingdom, and may the Blessings of Almighty God attend our most Gracious Sovereign King *GEORGE* now and for ever more. Amen.

Come now my little Book adieu to thee,  
Goe a thou art and let the World see,  
Thy Gold as well as Dross, if Gold thou have  
It's for thy Friend, thy Dross is for the Kaave,  
That takes Delight thy errors to unfold,  
That in the mire treads thy hidden Gold:  
But sure I think if in this little Book,  
Morus without his Spectacles should Look,  
Hee'l find no Gold herein but Dross and Chaff,  
Which being Useless he thereat may Laugh.  
But Skillful Art'st whoso'er thou art,  
Let me divide of thee for thy part,  
Without Disdain accept of whats therein,  
You of the Fo can have no more then's Skin.  
My Ragged Pen faint muse and Trembling hand,  
Cannot the Highest sublime things command,  
But what I have here in I freely give,  
Thou shalt have Better nex't year if I Live.  
Then march away my Book with winged speed,  
And fear no foes, (only of them take heed,  
But beg a Blessing may they Labours Crown,  
Ad never fear the Carping Critick's frown.
